Appendix 1 – Chronological thread of my improving practice narrative through publications and presented papers

Acknowledgements

So many have contributed to my journey there isn't room to say a personal thank you to everyone. The many members of the Improving Practice Conversation Café and the Tuesday/Thursday groups, the APEX staff and the children and young people whose lives have touched mine, are amongst those I do not individually name but I hope they know how highly I value the gifts they have offered over the years.

Many thanks to Jane Hill, Chris Jones, Nigel Harrison, Sandra Harris, Sonia Hutchison, Joy Mounter, Sally Cartwright, Barry Hymer, Belle Wallace, Tony Miles, Pete Mellet, Robyn Pound, Alan Rayner, Marian Naidoo and Andrew Henon for sharing their journeys and putting up with mine with good grace and inspiring energy. My thanks to Moira Laidlaw, Mark Latus and Michael Neugarten for their patient attention to my many redrafts. They have improved not only my thinking but also my English, an enterprise that has defeated many over the years.

I would like to say a very special thank-you to Pauline Miles and Jack Whitehead who are life-affirming and life-enhancing energy personified. Their unique gifts of loving wisdom, humour and friendship have made my world, and that of many, a much better place to be. Pauline's curiosity and persistent interrogations kept me going when I lost heart. I would not have started the journey except for the inspiration of Jack's academic contribution of Living-Educational-Theory and I wouldn't have finished without his good-humoured patience and support as one of the most talented educators I have ever known. Last, but by no means least, I would like to thank my Mum, who has been and always will be my inspiration to do the best I can, and my son, who is my inspiration to do things better.

Abstract

My educational practice is concerned with enhancing children and young persons' abilities to learn to live a loving, satisfying, productive and worthwhile life, for themselves and others. This thesis offers an original contribution to knowledge as a multimedia narrative. It communicates my ontological values of a loving recognition, respectful connectedness and educational responsibility, and social values of an inclusive, emancipating and egalitarian society. I clarify meanings of my values, as they emerge within living-boundaries through the evolution of my living-theory praxis, to form explanatory principles and living standards of judgment in my claim to know my practice.

Working as a senior educational psychologist responsible for implementing policy on high ability learning, I experienced the following concerns: Practice, theory and research often appeared to lose connection with the purpose of education; Theory and practice appeared to be developed independently, and without explanation or evaluation related to values of education; Those involved with education appeared to be in discrete worlds, each vying to exert their hegemony over the totalising development of educational theory, practice and provision.

Emerging from my research I offer four original ideas:

- 1) **Living-Educational-Theory praxis**, highlighting the fundamental importance of educators creating 'values-based explanation of their educational influences in learning' (Whitehead, 1989a), as they research to develop praxis within living-boundaries.
- 2) **Living-boundaries** as co-creative space within which energy-flowing values can be clarified and communicated.
- 3) **Inclusive gifted and talented education developed from an educational perspective**, which enables each learner to develop and offer talents, expertise and knowledge as life-affirming and life-enhancing gifts. The knowledge is that created of the world, of self, and self in and of the world.
- 4) **Living-Theory TASC**, a relationally-dynamic and multidimensional approach to research and developing praxis, which integrates Living-Theory (Whitehead, 1989a) with Thinking Actively in a Social Context (TASC) (Wallace and Adams, 1993).
