Title - Come and join us in an exciting dialogue: 'from action research to activism with a global community of Living Theory researchers.'

Overall aims – We wish to <u>extend</u> and <u>deepen</u> the global educational influences of action researchers who are focusing on activism with Living Theory research. The <u>extending</u> is focused on being accountable to living the value of global citizenship as fully as possible in explanations of educational influences in learning. The <u>deepening</u> is focused on developing the mutual understandings of researchers from different cultural contexts around the world

Mutual understanding will emerge as the participants share their explanations of their educational influences in their own learning, in the learning of others and in the learning of the social formations (workplaces and institutions) that influence practice and understandings. The explanatory principles in the explanations will be focused on the values that participants use to give meaning and purpose to their lives and carry hope for the flourishing of humanity.
