i am because we are and we are because i am

What I want to do

Contribute to the flourishing of humanity by supporting and promoting Living Educational Theory research and passion-led learning by children, young people and adults in the virtual and physical worlds

Why [Living Educational Theory research](#)?

Because Living Theory research is the process of individuals taking responsibility for understanding and improving the contribution their presence makes to the world. An individual's account of their living-theory includes their validated values-based explanation of their educational influence and clarification of their values-based standards by which they hold themselves to account.

Why passion-led learning?

Passion-led learning encapsulates, for me, learning that is imbued with human qualities such as vitality, humour, warmth, love, curiosity, creativity and a vibrant flow of a life-affirming and life-enhancing energy. In supporting and promoting passion-led learning (e.g. [APEX](#)) I hope to enable individuals to experience the pleasure and feeling of personal fulfilment of striving for excellence in developing and offering talents, knowledge and expertise as valued gifts that contribute to the flourishing of humanity.
