

Creating a living-poster is easy! Create your poster as a single slide using a common programme such as PowerPoint. (You can create a page in a document using a programme like WORD if you prefer)

A living-poster is intended as an opportunity **to bring attention to your sites of practice and your research passions and interests and help you connect with people with similar research passions and interests.**

Use images and minimal text to quickly communicate the essence of your sites of practice; interests; the values that motivate you and give your life meaning and purpose; research passions. Please use 'insert' (not copy and paste) and use low resolution images otherwise your file becomes huge!

Helps if you add:

- A photo of you, a few details of your context (e.g. where you are based) and your email address,
- A couple of your key publications,
- The url to your website if you have one (see below) and the url to your 2-3 minute video clip on YouTube of you communicating the essentials of: your context, interests, research passions, practice and values as the explanatory principles and living standards of judgment to which you hold yourself accountable in your practice

Send to jack@actionresearch.net:

- Two files of your living-poster
 - i. as a PDF **and**
 - ii. in whatever programme you have used to create it e.g. PowerPoint, WORD
- 1-4 keywords that summarise the essence of what you are about

Learn more about Living Educational Theory research and creating an account of your living-educational-theory by:

- visiting <http://ejolts.net/> and <http://actionresearch.net/>,
- reading Whitehead, J. (2018). *Living Theory research as a way of life*. Bath UK: Brown dog books. ISBN printed book: 978-1-78545-275-8 ISBN ebook: 978-1-78545-276-5

Creating your own website enables you to take control of what you do and don't want made public. You can update it as often as you chose and decide how much or how little you want to share. There are plenty of free website builders you can use. We have supported people to create their website using <http://www.spanglefish.com/> for years, as it requires no more skill than you use for creating documents or presentations. (If you need any help getting going drop us a note, we will be delighted to do what we can to help you)

Creating your 2-3 minutes video is easy. You don't need a special camera. Use the camera on your phone, your laptop or your computer. People tend not to watch more than 3 minutes of a video so shorter the better! This is to give people a flavour of your research passions and interests, your values – it is not a summary of your life's work. You might like to have a couple of goes at it and chose the one you like the best. When you upload to YouTube you might want to change the setting to unlisted if you only want it seen in connection with your living-poster.
