To: President of Fukuoka Prefectural University
Dean of Nursing, Faculty of Nursing
.....Dr Yesukata, Director for Education

Respected Colleagues,

Ref: Dr Adler-Collins: Visiting Professor of nursing, Fukuoka Prefectural University

It is with great pleasure that we write to you commending the actions and behavior of your faculty member and exchange scholar Dr Adler-Collins, who has taught in our faculty these last 3 months in accordance to our treaty agreement.

His duties consisted of teaching psychology to freshman and soft more students, western nursing and western culture. He was well received by his students who responded well to the new teaching styles, methods and curriculum. His approach to western culture especially using action research as an approach was particular inspiring to the students who produced a highly successful fashion show.

His commitment to his teaching, classroom, and students is to be commended, as is his desire to assist faculty in bettering their written and oral English. A daily evening English corner class was a particular success with participants joining from the local community, other faculties and Medical Doctors from the local hospital.

We unreservedly extend our invitation for Dr Adler-Collins to come back again to teach in our school as part of next year's exchange of faculty to strengthen and build on the foundations of our co-operation so successfully laid down on this visit.

Yours sincerely

Yufang Zhao
