Research Interest

- **Multiculturalism**: specific to special populations such as disabilities, social classes, and marginalized groups.
- **Gender and Sexual Issues**: specifically on parenting, sexual education, resilience, and advocacy guidance and counseling/ social justice.

My Value

Islam
Gender Equality
Multicultural Indonesia
Sosial Justice
Self Acceptence

Work Experience

- As a lecturer, I have taught case study courses in BK; media in guidance and counseling, career counseling, guidance and counseling crisis, and assessment in guidance and counseling. In the classroom, I always **try to include discussion of my research interests in sessions**. As an advocacy campaign effort on various gender and sexuality issues. The majority of my students come from areas where there is still a **strong cultural taboo** against discussing sensitive and gender issues related to women and children. Through **project-based learning**, the students understand and refute myths with facts and seek solutions to the problems they find. Students found the course successful in providing them with **new insights** and **awareness** of what they need to do as community counselors.

- In the last two years, I have lectured and mentored students in practical field experiences at the West Kalimantan Provincial Women's and Children's Empowerment Agency.

- The last research that has been completed are: **"Guidance and Counseling Advocacy Services for Handling Sexual Violence at IAIN Pontianak"** and **"Survey of Sexual Harassment to Students at Indonesia University"**.

Roadmap Framework

Sexual Violance ⟶ Advocacy / Social Justice guidance and counseling

- Champagne Sexual Education and gender issue
- Counselling for special populations (Victim and Bystander with trauma)
- Resilience for victim
- Counselor competency for assistance victim and bystander
