UK Conference Sept 2022 Group

The aim of the international virtual Living Educational Theory Research Scholarship group is to provide:

A convivial, trustworthy and productive space for educational-practitioner research conversations and an opportunity for connecting with others beyond the 'day job' to keep energy going.

An opportunity for:

- Conversations with others who share a passion for making a values-laden difference that matters
- Support to help you strengthen your research, improve your practice and test validity of claims to be improving matters (claims to be having an educational influence in the learning of others and social formations) – and help others do so too
- Drawing on variety of thinking and knowledges to extend cognitive range and concern
